About This Template

This template provides a simple way to create a Gantt chart to help visualize and track your project. Simply enter your tasks description, Progress as a percent of completion of the task, a Start Date and Number of days to complete the task. The Gantt chart auto updates. A scroll bar allows you to scroll through the timeline. Insert new tasks by inserting new rows.

Customize the look of the chart by modifying the conditional formats.

Dates up to the current day are shaded in the timeline.

Guide for Screen Readers

There are 2 worksheets in this workbook.

Gantt Chart

About

The instructions for each worksheet are in the A column starting in cell A1 of each worksheet. They are written with hidden text. Each step guides you through the information in that row. Each subsequent step continues in cell A2, A3, and so on, unless otherwise explicitly directed. For example, instruction text might say "continue to cell A6" for the next step.

This hidden text will not print.

To remove these instructions from the worksheet, simply delete column A.
